Meat Traders

Dear Sir / Madam

OUTBREAK OF AVIAN INFLUENZA (AI) IN KAMPERVEEN, OVERIJSEL, THE NETHERLANDS

The Netherlands reported an outbreak of H5N6 Highly Pathogenic Avian Influenza (HPAI) in a duck farm located in Kamperveen, Overijssel.

In view of the outbreak, AVA will impose a temporary restriction on the importation of poultry and poultry products to the 10 km restricted area around the affected premises in Kamperveen, Overijssel, the Netherlands, with effect from 14 March 2018. Heat-processed poultry products, which meet the requirements for destruction of AI virus, will not be affected by the import restriction. For import from unaffected areas in the Netherlands, additional certification is required on the veterinary health certificate as listed on Annex 1.

Please contact Ms Lily or Ms Zawiyah at 6805 2857 / 6805 2863 should you have any enquiries on the import of poultry and poultry products.

Yours faithfully

Li Lu
Senior Executive Manager (Food)
Quarantine & Inspection Group
for Director-General
Agri-Food and Veterinary Services

Annex 1

The additional certification should state on the Veterinary Health Certificate:

- a. Highly pathogenic avian influenza (HPAI) and H5 and H7 low pathogenicity avian influenza (LPAI) are notifiable diseases in the country of export.
- b. The birds from which the meat was sourced were not vaccinated against H5 and H7 subtypes of avian influenza (AI), as defined by the World Organisation for Animal Health (OIE).
- c. The poultry meat and meat products were not derived from birds originating from the 10 km radius restricted area around the affected premises in Biddinghuizen (Flevoland), Oldekerk (Groningen), Kamperveen (Overijssel) and the 1 km radius restricted area around the affected premises in Sint Philipsland, Zeeland.
- d. The poultry from which the meat was derived were born, raised, and slaughtered in the Netherlands, or were legally imported as day old chicks from countries with equivalent poultry health status.
