Building a *new* National Trade Platform

A Vision for the *Future* of Singapore Trade

Announcing the National Trade Platform

Excerpt from Budget Speech 2016 by Minister for Finance

As a one-stop trade information management system, the National Trade Platform will enable electronic data sharing among businesses and government. Firms only have to provide trade information once and authorise its use by logistics providers as well as business partners. The information can also be used for Customs and other trade regulatory approvals. This will be especially helpful for SMEs, to cut costs and streamline processes.

The National Trade Platform is not just an IT system. We will develop it as an open innovation platform, so that other service providers can develop value-added services and apps in areas such as operations, visibility and trade finance.

Next-generation platform

One-stop trade information management system

Cut costs and streamline processes

Open innovation platform

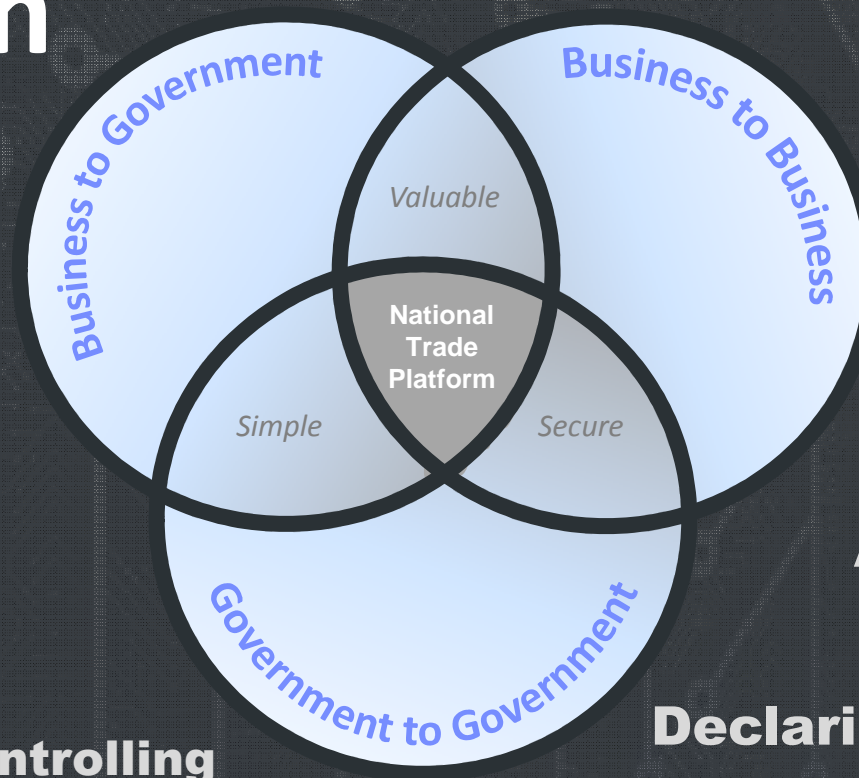

The Vision

A **national** trade info-ecosystem that provides the **foundation** for Singapore to be the world's **leading** trade, supply chain and trade financing hub

Single Integrated Platform

The National Trade Platform will be an integrated national trade info-ecosystem that coordinates and facilitates trade and information sharing on a single platform

Importers / Exporters

Air/Sea Carriers Freight Forwarders

Ground Handling Agents Port Operators

Financial Institutions

Value Added Service Providers Application Developers

Declaring Agents

Controlling Units Competent Authorities Trade Government Agencies Associations

Presenting the New

NATIONAL TRADE PLATFORM

Connecting businesses. Boosting competitiveness. Creating opportunities.

Value Proposition

Productivity

Digitised data for faster processing

Competitiveness

Enabling businesses through supply chain **visibility** and value-added **services**

Opportunities

Insights driven from rich pool of data

Connections

Extending **connections** across a vibrant trade community

Core Capabilities

Company Repository

Secure cloud-based repository for companies to **exchange** data and documents with partners and Government

Data Management

Common data services for **translation** to **standardized** and **industry** digital formats (e.g. IATA efreight, ebXML)

Developers' Sandbox

Toolkit to help developers **design** and **build applications** for NTP

Unified Trade Portal

Information and **services** for stakeholders across the supply chain, e.g. list of VASes, useful statistics, news and upcoming events

Digital Trade Connectivity

Cloud-based **B2B/B2G platform** for process integration and **exchange of messages**

Trade Documents Digitisation

Capture, **recognise**, **classify** and **extract** and **link** information from documents to streamline trade processes

Unified Trade Portal *Features*

**360 Degree
View**

**Trade Documents
Digitisation**

**Connectivity
with Customs**

Track & Trace

Unified Trade Portal

Benefits

- Helps businesses raise capability and productivity:
 - one stop
 - seamless access & interactions
- Track and trace + 360 view capability
 - especially for SMEs
 - 360 company profile
- Tailored to traders' needs (importers, exporters, freight forwarders, declaring agents, manufacturers, licensees etc.)

Dashboard - 360 View

Complete view of company's info

- Company Admin
- General business information
- TradeFIRST Overview
- Business Profile Information
- Declarant / Declaring Agent Overview
- Claimant Overview
- IBG/BG Overview

Interactions with *Customs*

- Ease of **submitting** enquiries & feedback
- Ease of **updating** of company's info with Customs
- Ease of **access to Customs' services**
- Ease of **receiving** relevant info
- Ease of **application**
- Visibility of **existing and past interactions**

Schemes & Licences Module

Features

- Seamless Scheme/Licence Application Process
 - User Centric. Single point for licensee or applicant to transact with Customs, e.g. apply/ renew schemes, enquire application status and complete TradeFIRST assessment.
 - Provides notifications for better management of transactions, e.g. alerting licensees on schemes /licences due for renewal.
- Documents Digitisation
 - Doing away with hardcopy submissions

Schemes & Licences Module

Benefits

- Enhances overall customer experience and interactions with streamlined processes
- Enhances productivity as data submitted to Customs previously can be retrieved and re-use (where applicable) for future transactions

Inventory Control Module

Features

- Seamless Inventory Management Process
 - Streamlined and centralized module to manage stock-related transactions for licensed premises
 - Provides notifications for better management of transactions, e.g. alerting licensees upon Customs approval of applications.
- Accessible E-services and Information
 - E.g. view stock information, request for adjustment of stock details or conducting of other operations such as survey and destruction.

Inventory Control Module

Benefits

- Enhances overall customer experience and interactions
- Enhances the Inventory Management Process
 - Facilitates transactions with Customs, e.g. allows submission of creation and amendment of lots, and stock adjustments online or via file upload by licensees.

A hand is shown holding a glowing globe composed of numerous small, golden-yellow dots. The background is a dark blue gradient with a subtle grid pattern. The text is overlaid on this background.
