ICP and Role of Organization

Security Export Control Code

Chapter 1 General Provisions Article 1, Purpose

This Code is provided to adequately implement security export control in the purpose of maintaining international peace and security.

Article 2. Scope of Application

This Code shall be applied to activities conducted by Yokogawa Electric Corporation (hereinafter "Yokogawa") of export of goods, transfer of technologies to normesidents, transactions to transfer technologies in a foreign country (hereinafter "Technology transfer"), proketing trade transaction and broketing transaction of technologies.

Article 3 Detinition

<ICP Contents>

- Organization and role
- Classification procedure
- Transaction check procedure
- Shipping check procedure
- Audit
- Education
- Record keeping
- Escalation
- Penalty

Export Control Organization

The President as Chief executive

- Total responsibility

Administrative Division of Export Control

12 dedicated members

- Establishment of company code
- Updating regulation information and reflecting on internal procedures
- Final product classification
- Sensitive case transaction check
- Training and Audit

Export Control Staff in Business Unit / Affiliates

140 members worldwide

- Support of operations in each department

Key Tasks

Product Classification

- Incorporated into regular product development rule
- Double check by Export Compliance Dept.
- 250 classification cases a month

Transaction Check

- Sales department for all transactions
- Export Compliance Dept. for sensitive cases
- 200 sensitive cases a month

Shipping Check

- Physical check and document check
- Screening all export orders to prevent failures
- 10,000 export orders a month

Implementation of Transaction Check

Only one careless transaction could lead to endanger our entire group business.

How could we effectively check 10,000 transactions a month to avoid risks?

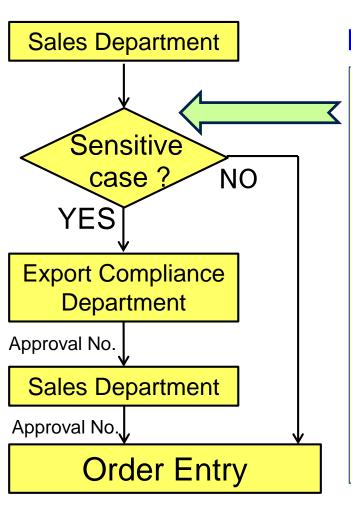

We have introduced "Weighting Management" of transaction check.

Weighting Management of Transaction Check

Sensitive case to be approved by Export Compliance Dept.

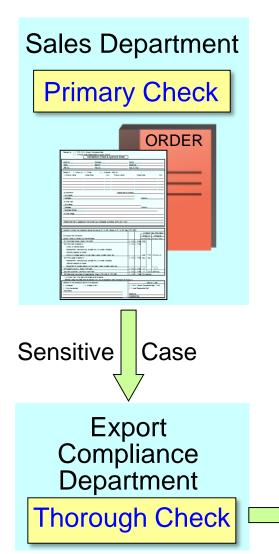

Key questions to judge "Sensitive Case"

- 1) Controlled Items included?
- 2) End User is/was related to concerned activities ?
- 3) End Usage is/was related to concerned activities?
- 4) Specific Country involved?
- 5) Unknown entity involved?
- 6) Restricted Organizations involved?

Transaction Check for Sensitive Case

Materials for Thorough Transaction Check

1.Own Transaction Data Base record

Transaction Record Data Base

- Application information
- Inquired products and quantity
- Contractor / End user name
- Spare parts request

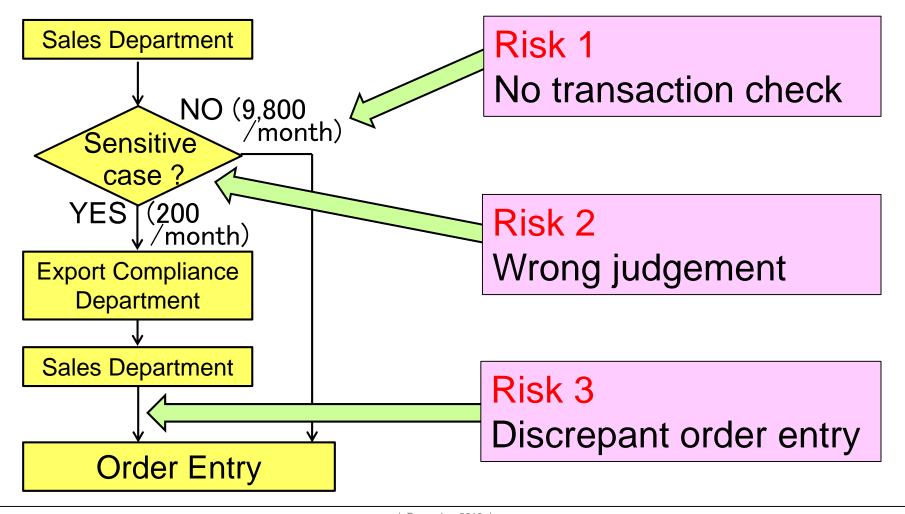

Keeping transaction record in database helps a lot for future inquiry check

- 2. External Information Source (database)
- 3. User's website
- 4. Evident document
 End-use certificate may be requested as necessary

Risk of "Weighting Management"

"Making rule" is not enough to avoid risks

Shipping check to find failure of transaction check

Screening all export orders to prevent failures

Order entry > Production

Shipment

Production starts automatically after order entry

Shipping after check

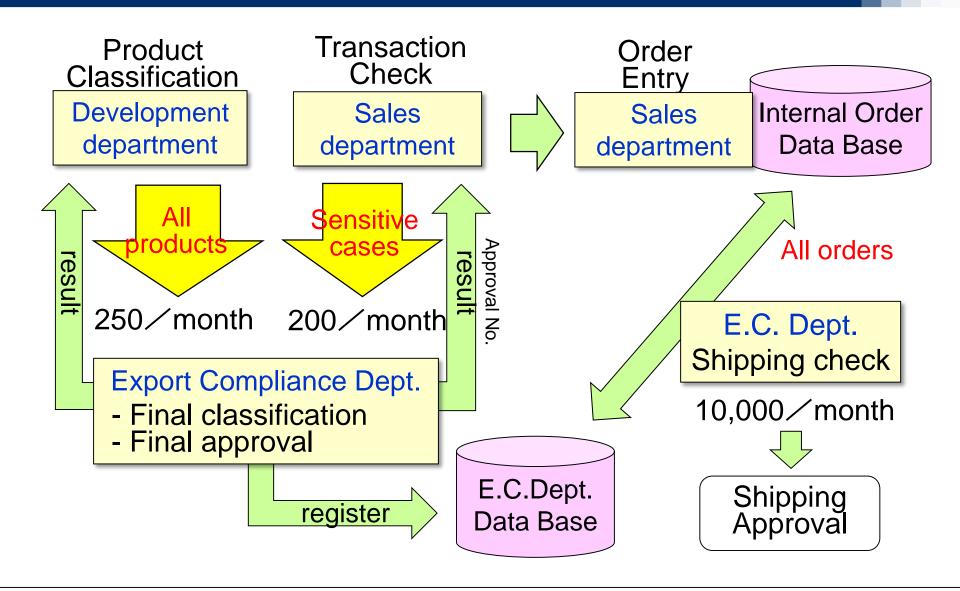

Order system stops shipping until shipping check is approved

Shipping check confirms:

- That the transaction is approved by Export Compliance Department for sensitive case orders
- That the order contents are consistent with the approved contents in the transaction check
- If an export license is to be obtained

Whole System of Yokogawa Export Control

Summary

Business circumstances

- ✓ Majority of sales coming from overseas market
- ✓ Large number of export orders
- ✓ Many concerned countries in our user sites

Export control operations

- ✓ Classification task incorporated into procedures
- ✓ Transaction check by "Weighting Management"
- √ Final shipping check to cover all export orders

Co-innovating tomorrow Thank you very much for your attention
